CADM ROTARY COLLATOR

The CADM Rotary Collator is the answer to your time consuming jobs. It is built to meet the needs of offices and duplicating departments, large or small. Constructed of heavy gauge steel, with self-lubricating bearings. Rubber mountings eliminate all undue wear, noise and vibration. The positive speed control lever is placed in easy reach of the operator. Speeds are numbered to give best production rating depending on the type of job to be collated. By movement of this squeeze type lever, impulse is generated on the drive mechanism to instantaneously alter the speed of the collator. The multiple foot control is an exclusive feature. It consists of a ring one foot above floor level which activates a switch. By pressing the toe on this ring, from any position around the collator table, the machine will start or stop. There is a comfortable foot rest to maintain the relaxed position of the operator. Equipped with AC, 1/4 HP, 110V, 60 cycle single phase motor.

BINDERY TRUCKS

"ALWAYS A TOP SHELF"

Look for these outstanding features:

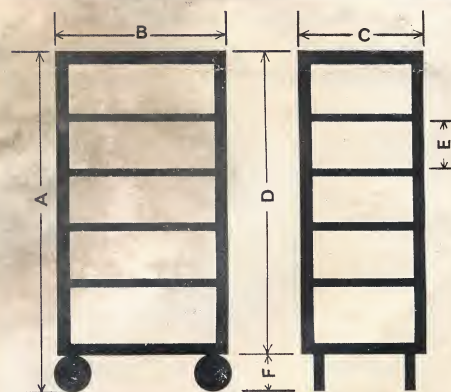

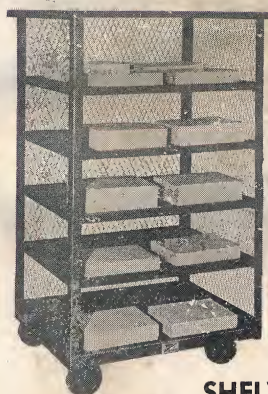

- **Easy to load and unload . . .** because each shelf is a "top shelf" . . . even the BACK corners of the lower shelves can be easily reached.
- **Easy to maneuver in and out of tight places . . .** because it has 4 swiveling, ball bearing, rubber wheels.
- **Strong, yet light in weight . . .** because of angle iron frame construction and expanded metal panels.
- **Simple and safe to operate . . .** because each shelf pivots effortlessly upward and locks securely into place as desired.
